

WHOLEWORLD-VIEW

A

Unifying Framework

Your worldview matters...

A worldview is the set of beliefs about reality that ground and influence someone's perceiving, thinking, feeling and doing. It's someone's framework for experiencing, making decisions and behaving in the world

A worldview is someone's mindset, outlook on life and values; informed by cultural, faith and religious, social and experiential factors

At a WholeWorld-View (www.wholeworld-view.org), we consider that an emerging and positive transformation of global society will accelerate when enough of us expand our current identity and worldview from Me to include We and All

A WholeWorld-View Unifying Framework

We have generally been taught that reality is solely materialistic, made up of separate objects and that competition is key to survival

This worldview drives behaviours of inequality, conflict and now, even the threat of our extinction

To survive and thrive as a species,
we need to expand our identity, world-view and awareness
from Me to include We and All

The latest scientific evidence is revealing the unified nature of reality and showing that separation is illusory. It is converging with universal spirituality in an emergent language of unity

This unifying framework aims to offer multiple entry points into our unfolding adventure of unity awareness and conscious evolution.

We invite discovery of your own story of understanding unity, choosing your own adventure of experiencing it and answering an embodied call to evolutionary purpose that serves you, your wider community and Gaia

The Science of a WholeWorld-View – key points

In-formation

Information is the most basic building block of our Universe, just like the digitised bits of our communications technologies.

Big Breath

Our Universe began 13.8 billion years ago, not in the implicit chaos of a 'Big Bang', but as an exquisitely ordered, incredibly fine-tuned, continuing Big Breath, embodying an inherent and coherent impulse to evolve from simplicity to complexity

Holographic and Nonlocal

Our Universe is also holographically manifested and nonlocally unified

Mind and Consciousness

Mind and consciousness, articulated as digitised and meaningful in-formation and expressed as the energy-matter and space-time of our Universe, is not something we 'have' but what we and the whole world ARE

The science of a new wholeworld-view reveals the innate multidimensionality and unified nature of reality

Conscious Evolution....

Our Planet is calling to us to WAKE UP: rapid climate change and environmental destruction is reflecting the need to expand our awareness

Our unsustainable interactions with each other, resulting in inequality, injustice and conflict are calling us to GROW UP and change our behaviours

The damage we have caused to ourselves and our planet is calling us to regeneratively CLEAN UP and co-creatively SHOW UP

A WholeWorld-View, by serving our understanding, experiencing and embodying unity awareness, aims to empower all the above and facilitate us to

LINK UP and LIFT UP to consciously evolve

The Spiral of Evolution - Expand your Identity!

The WWV Unifying Framework

Understanding Unity

Mind and consciousness is what we and the whole world are.

Experiencing Unity in Diversity

Living our natural unique diversity in our global and universal family of unity

Living our Evolutionary Purpose

Re-member and reconnect to our authentic evolutionary impulse and purpose

Understanding Evolution

Our Universe exists *to* evolve. Understand what it means to be human and our evolutionary potential

Embodying Unity

Understand, Experience, Embody our Story of Me in We and All

Choose, Connect, Co-Create

Act Local

A Story

An Adventure

Experiencing

A Call To Action

Embodying

Act Local

In the coming years, the choices of each and all of us will determine the fate of our species and life on Earth.

Globally, change agents are designing, developing and manifesting unity-based communications and structures in numerous areas, including; finance and economics, science and technology, education, wholistic wellness, politics, governance, justice, peace, media, arts and culture, architecture, social entrepreneurship.

Locally, individuals and communities are embarking on quests and practices of 'sacred normality' - reconnecting to each other, Gaia and the universal pulse of evolution that flows through us. We are re-mem-bering what it means to co-create lives of meaning, purpose and responsibility. Communities are rediscovering their ability to find local solutions to global challenges. Crisis breeds opportunity and innovation.

The 8 principles of co-creativity (Relativity, Resolution, Reflection, Resonance, Change, Choice & Consequence, Conservation and Concession), are emerging as a structure through which local action is aligned to global / universal vision.

We are waking up, growing up, cleaning up, showing up – and linking and lifting up
To begin to share a new story of what it means to be human

Feel Global

We are all indigenous to Earth – we are Gaia’s children.
Like a healthy resilient ecosystem, within the wholeness of the all,
our global experience is manifested through the radical diversity,
uniqueness and purpose of me and we.

The illusionary story of separation is breaking down. We either evolve globally together or become extinct as a species. In these pivotal times of breakdown and breakthrough, we can re-member and ‘feel’ our inherent connection to each other and Gaia, and co-create a thriving future for all. It is time to evolve through love, from the inside out.

While the process of re-memembering unity is unique to each individual,
all are paths on the same journey of inner and outer evolution.
We can choose to become unity aware beings, and in acting local and feeling global, experience and embody wholeness.

We are indeed in this together. And we always have been.

Think Cosmic

As a species, never before have we had so much evidence that we are living in an interdependent and in-formed Universe that not only exists and evolves as a unified entity – but exists TO evolve. We are coming to realize that mind and matter are unified – and our Universe is a great thought rather than a great thing.

Leading edge science is discovering that separation is an illusion. That mind and consciousness in-forms the co-creation of all realities and states of existence.

Every micro aspect of existence contains the in-forming codes of the macro Universe.

We are alive in a critical evolutionary moment. After 13.8 billion years of evolution, our Universe has birthed us as a self-aware species. We now have a choice to become unity-aware beings and conscious co-creators with our Universe and its ongoing evolutionary impulse.

As we collectively re-member the multi-dimensional and unified All of the Cosmos, we can choose to move from fear to freedom, chaos to co-creation, and 'pieces' to 'peace' on Earth.

Calls to Evolutionary Purpose & Action

Shift the story from chaos to co-creation

Transform emotions from fear to freedom and LOVE

Take positive actions that move us from victim to volition

Evolve our worldview from separate pieces to unified peace
